

ScriptSwitch

Advancing Medicines Optimisation

ScriptSwitch[®] is a proven, clinically led solution for meeting NHS optimisation goals. It enables clinicians to make safe, evidence-based decisions at the point of prescribing, realising cost-savings and improving clinical effectiveness and patient outcomes. The Optum 2021 Roadmap introduces innovative features, setting new standards of safety, performance, and ease-of-use.

ScriptSwitch is our flagship medicines optimisation solution. It identifies safe interventions at the point of prescribing, based on intelligent evidence-based clinical insights. As the first prescribing decision support tool in the UK, it is a proven and trusted approach to effective medicines optimisation at practice level¹.

- Improving **clinical effectiveness** and **delivering cost efficiencies** to the NHS of circa. £360m since 2009
- Improve prescriber engagement through clinically-led updates and national guidance (including NICE, MHRA, UKMI, NHSE, BNF, BNFC, RPS and DM&D), **supported by Keele University's Centre for Medicines Optimisation**
- Reduce the workload of your team with centrally authored national profile content support
- Put **local Medicines Optimisation** initiatives into practice, with ScriptSwitch
- Stay up to date with **national indicative stock alerts** and locally authored formulary changes — live in two hours
- Make implementation easy with the help of our **outstanding customer support** and a dedicated clinical account management team

Generates a positive Return on Investment across the health economy

ScriptSwitch, proven over 20 years

- **Unique to ScriptSwitch** — **Reduce waste and improve safety** with the unique Quantity Limits feature, the first of its kind in prescribing decision support. Easy to implement with a library of clinical content ready to approve and deploy delivering immediate value
- **2021 Roadmap** — Delivering **four major enhancements** for a more intelligent, innovative and advanced ScriptSwitch that aims to increase prescriber engagement, safely lower healthcare costs and improve patient outcomes

¹, On the market since 2003, now covering 81 systems and 27 million patient lives

Working collaboratively

Optum partnered with Bristol North Somerset and South Gloucestershire CCG to roll out ScriptSwitch through remote activation serving a population of around one million people. Working collaboratively, Optum and the CCG achieved these excellent results.

“Close working between the CCG Medicines Management team and Optum ScriptSwitch has helped us achieve these positive outcomes”
— Principal Medicines Optimisation Pharmacist

Clinically led

Optum UK is a clinically led organisation, with a whole systems approach to making healthcare systems work better. Clinical knowledge and data are at the heart of what we do, and we dedicate our expertise to developing solutions for every day clinical practice that address the challenges of medicines optimisation and population health management.

We use data analytics and clinical insights, underpinned by our extensive knowledge of healthcare systems to empower safe, impactful interventions, based on the principles of the right care, right time, right cost.

Medicines Optimisation Solutions		Improve Compliance	Avoid unnecessary medicines	Reduce wastage	Improve safety	Clinical effectiveness	Cost effectiveness
Accelerate: Rapid standardisation in 12 weeks with no up-front cost	Who does the product target? CCG, patient centred Prescribing Pathway: Independent Proactive prescription management End Users: Optum implementation, Sign off by CCG		●	●	●	●	●
ScriptSwitch: Safe, evidence-based decisions at the point of prescribing	Who does the product target? Patients Prescribing Pathway: Reactive Decisions and Point of Care End Users: Prescribers / Clinicians	●	●	●	●	●	●
Proactive: New Product Coming Soon: Actionable, clinical insights and interventions – at any time	Who does the product target? Populations Prescribing Pathway: Proactive Ongoing Prescription Management End Users: Practice-based Pharmacists / Clinicians	●	●	●	●	●	●

We are clinically driven and have extensive NHS expertise. The Optum UK clinical team has a depth of experienced clinicians including doctors, nurses, pharmacists and paramedics.

We have access to global, real-world experience in solving local and national health problems and delivering real benefits.

We turn actionable insights into impactful interventions, with clinical knowledge and data at the heart of what we do.

What new ScriptSwitch 6.0 is designed to do²:

Optum is currently developing ScriptSwitch 6.0 and aims to set new standards of safety, performance, customisation, and ease-of-use in its new and enhanced features. It is part of our roadmap of investment and enhancement to ensure that ScriptSwitch provides 'best-in-class' support for the evolving demands of medicines optimisation and population health.

Planned features under development:

- ✓ ScriptSwitch Safety Alerts, identify clinically important interventions including surfacing adverse drug reactions in real-time through integration and updates of PINCER rules
- ✓ Patient centric, context-based decision support with full patient record integration, enables safer, more cost-effective prescribing choices
- ✓ Financial, provider and profile performance dashboards, designed to be user-friendly with option to generate local and customised insights with 'Build it yourself' reports.
- ✓ PINCER rules will be delivered direct to Primary Care Clinicians, helping to reduce preventable adverse drug reactions and emergency admissions, co-produced through our partnership with PRIMIS from the University of Nottingham
