

Accelerate

Advancing Medicines Optimisation

Accelerate is a rapid results solution to meet NHS medicines optimisation goals, delivered by an experienced team of clinical pharmacists. It enables Integrated Care Systems to achieve accelerated, sustainable savings within 12 weeks with no upfront cost.

Optum[®] Accelerate is a programme proven to enable health systems to rapidly achieve medicines optimisation savings goals. It is delivered and implemented in partnership with our dedicated pharmacy team, who use up-front data-diagnostics to suggest cost saving opportunities through safe, clinically robust interventions.

We work as an extension of your Medicines Optimisation team, providing additional capacity and more efficient use of NHS resources, and aligning with existing work plans and local formularies. Accelerate has low impact on patients or local teams and there is no up-front cost, with payment based on validated, evidenced savings by the commissioner at the end of the programme.

Accelerate, rapid savings in 12 weeks, with no up-front cost

Delivering proven, validated to the NHS and CCGs since 2019.

- Make savings now with **no up-front** cost. Optum work on an innovative 'risk/reward' financial outcomes-based contract, with daily performance updates
- Rapidly advance your local Medicines Optimisation initiatives, with Accelerate. Independent from the pharmaceutical industry, Optum's solution is **tailored to local priorities, formularies, pathways and ways of working** with switches agreed by the commissioner
- Work with Optum's highly experienced **clinical and pharmacist** team, who will implement your Accelerate programme
- Confidence of a **clinically led** solution. We operate robust governance processes and embed clinical knowledge and data at the heart of everything we do

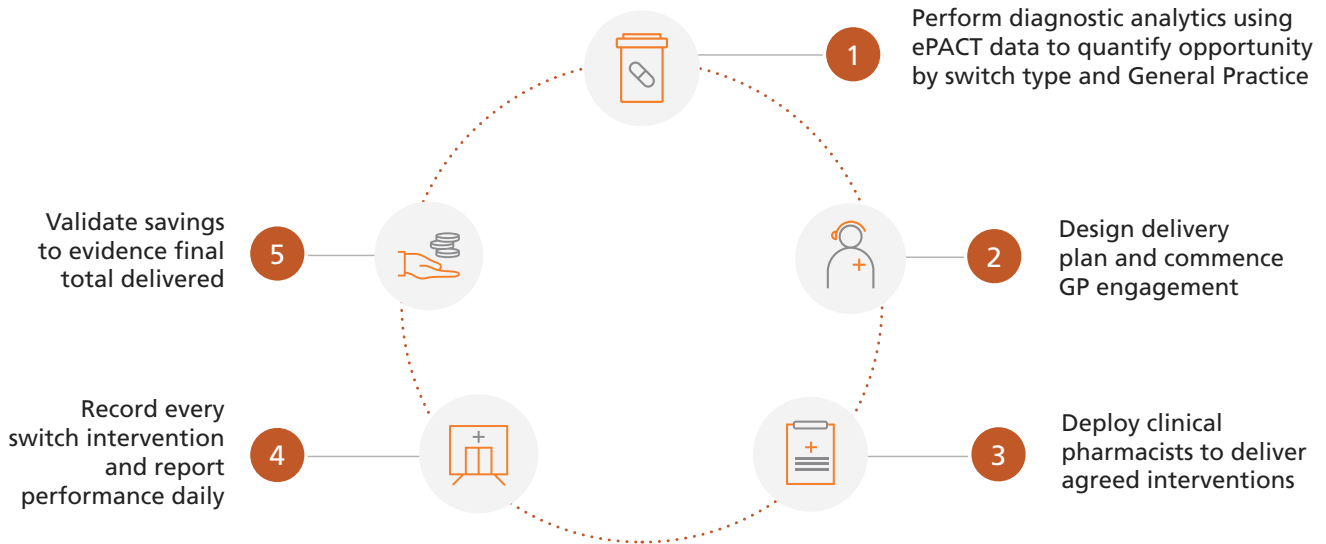

* [Link to Accelerate Case Study](#)

- Independent **12-week programme** to identify and implement switches
- **Return on investment is assured** through immediate savings, recurrent savings, and a reduction in lost, unrecoverable savings
- Wrap-around Agile programme management, layered with clinical and information governance support to lessen impact on the system and practices

Guaranteed Return on Investment and excellent customer feedback across CCGs, General Practice and on-site staff

Approach overview

Results for one CCG

Through our rapid delivery programme, Accelerate delivers in-year and recurrent savings across high impact areas and reduces lost, unrecoverable savings. To illustrate this, in one CCG with 30 GP practices, Optum pharmacists delivered these excellent results:

£800K of validated savings in 12 weeks

Validated savings of **£123** per patient switched saving approximately £3.10 per registered patient)

Over **8,000** patient reviews, resulting in **6,500** medication switches to more cost-effective alternatives

“ (The Optum Accelerate service had a) positive impact. Messages were sent to patients advising them of a switch to an approved brand, and this reduced the number of queries received. Fantastic!”

— Practice Manager

Clinically led

Optum UK is a clinically led organisation, with a whole systems approach to making healthcare systems work better. Clinical knowledge and data are at the heart of what we do, and we dedicate our expertise to developing solutions for every day clinical practice that address the challenges of medicines optimisation and population health management.

We use data analytics and clinical insights, underpinned by our extensive knowledge of healthcare systems to empower safe, impactful interventions, based on the principles of the right care, right time, right cost.

“ Very professional service by the team who worked at the Health Centre. I didn't even know they were here.”

— GP, Dartford East Health Centre

Medicines Optimisation Solutions		Improve Compliance	Avoid unnecessary medicines	Reduce wastage	Improve safety	Clinical effectiveness	Cost effectiveness
Accelerate: Rapid standardisation in 12 weeks with no up-front cost	Who does the product target? CCG, patient centred Prescribing Pathway: Independent Proactive prescription management End Users: Optum implementation, Sign off by CCG		●	●	●	●	●
ScriptSwitch: Safe, evidence-based decisions at the point of prescribing	Who does the product target? Patients Prescribing Pathway: Reactive Decisions and Point of Care End Users: Prescribers / Clinicians	●	●	●	●	●	●
